## Goals United

Life Skills Residential apartment living programs help fulfill major life goals for our clients, including independence, dignity, and happiness.

Our residential programs support clients with community engagement, including work, therapies, recreational activities, and socialization.

## Independence with Oversight

Our residents reside in furnished single occupancy one and two-bedroom apartments in the Metro Detroit area.

Trained Life Skills Residential staff are onsite twenty-four hours a day.

Our residential plans are individualized and unique to each resident. We provide transitional and long-term post-acute care in settings that range from our unique AFC apartment program to community-based semi-independent living. Our locations are near rehabilitation providers, shopping, restaurants, parks, and recreation.

**Life Skills Residential is a Patient's Choice program and clients can receive therapies from external providers of their choosing.**

AFC (Adult Foster Care)	Supervised Apartments	SIL (Semi-Independent Living)
<p>Providing personal care and assistance with daily activities in a safe and comfortable setting. Caregivers offer support in a more personalized environment than traditional nursing homes. AFC is ideal for individuals who need regular assistance but prefer a more dignified atmosphere.</p>	<p>This model is often used for individuals who enjoy higher function (than what AFC provides), but still need a level of support, supervision, and assistance throughout the day. Can be a transitional step for those looking to reclaim a level of independence in a safe and supportive environment.</p>	<p>A tiered level of community living, flexible to meet the needs of individuals at various stages of ability. Frequently the aim is to help gradually regain independence and confidence, preparing for a successful return to fully independent living, while still providing a safety net of support.</p>
